

North Campus - Innovation Center - Proposed Improvements

[Lucas Schraudben] Hi, my name is Lucas Schraudben, Director of Secondary Programs here at Holt Public Schools and I'd like to share with you the building improvements that would be made here at North Campus for our proposed Innovation Center, if the bond were to be approved by taxpayers. Proposed improvements at North Campus would include critical infrastructure improvements, which would be improving the HVAC systems, including air conditioning, replacing the pavement, sidewalks, and curbs. Replacing select roofing and doors. Upgrading electrical distribution, upgrading building management systems, and replacing drinking fountains. Safety and security: Remodeling secure building entrance. Replacing selective door hardware. Improving site traffic safety and flow for pedestrian safety. Learning environments: Replacing classroom office and Media Center furniture and equipment. Replacing flooring, ceilings and cabinetry. Upgrading instructional technology and student devices. Upgrading classroom audiovisual equipment. Innovation: Fostering student growth by maximizing learning and engagement by offering programming options that align with students' Postsecondary plans. Dedicated spaces for relevant, meaningful student centered learning experiences, with things like Robotics, Aviation, Early College and career technical education and more. Modernize facilities to maximize educational opportunities, flexibility and safety while considering environmental sustainability and future operating costs.
